

SDLC (listening)

Watch the video and answer the questions

https://www.youtube.com/watch?v=LBvbQLk8H6w&ab_channel=GreggU

1. What is SDLC? Choose the best definition:

- a) A framework that defines the development of any information system at each phase.
- b) These are the steps to create information system.
- c) A formal, multistage process through which information systems are implemented.
- d) It's turning theory into practice in the form of a new computerized system.

2. Match each phase with appropriate goal and put them in the right order.

Blueprint (n) - an early plan or design that explains how something might be achieved.

Maintenance	a) The blueprint of the system is finalized
Analysis	b) Includes long-range or strategic planning and short-range operational planning
Implementation	c) The system is built, tested, and retested for a go-live stage (put into operation)
Planning	d) The primary objective of the phase is to prolong the life of information system
Design	e) The organization's current capacities are documented, new needs are identified, the scope is determined
